TECHNICAL SKILLS

Frontend Development

- TypeScript
- React
- Tailwind
- CSS
- JavaScript

Backend Development

- Node.js
- Java
- Python

Database Management

- MySQL
- PostgreSQL

Communication Tools

- Slack
- Google Meet
- Microsoft Teams

Tools

- Git / GitHub
- PostMan
- Swagger
- Prettier
- OWASP Dependency Check

PERSONAL SKILLS

- Responsible & Hardworking
- Quick Learner and Adaptable
- Strong team player & Communicator
- Organized & Detail-oriented
- Efficient and task-focused
- Able to complete tasks quickly and efficiently

LANGUAGES

- English
- Tagalog (Fluent)

PROFILE

A motivated and detail-oriented Computer Engineering student with strong backend development skills, the ability to assist with minor frontend tasks, and extensive knowledge of computer hardware. Skilled in electronics, computer systems, and troubleshooting, with a strong interest in applying technical knowledge in real-world environments.

WORK EXPERIENCE (INTERNSHIP)

System Sense Corporation (Japan) JANUARY 2026 - PRESENT
Backend Developer transiting to Full Stack Developer

- Developed and maintained backend services and APIs to support web application functionality and system integration.
- Collaborated with the development team to design, implement, and optimize server-side logic and database operations.
- Assisted in integrating backend systems with frontend interfaces to improve overall application performance and usability.
- Participated in debugging, testing, and troubleshooting software issues to ensure system reliability and stability.
- Contributed to the development of scalable and efficient backend architectures for company projects.
- Supported the transition from backend development to full stack development by working on both server-side logic and basic frontend components.
- Worked with databases to manage, retrieve, and update application data efficiently.
- Assisted in improving system performance, code quality, and development workflows through collaboration and code reviews.
- Applied knowledge of computer hardware and system troubleshooting to support development and testing environments.
- Built and maintained backend APIs to handle order processing and device management functionalities.
- Developed systems for transaction handling and sales data consolidation and reporting.
- Created and structured database schemas, including designing ER diagrams to support system architecture.
- Implemented automated testing processes and integrated security scanning tools to enhance system reliability and security.

EDUCATION

Bachelors of Science in Computer Engineering 2020 - Current
School of Engineering & Architecture | Holy Angel University
